

Media Lab Equipment and Software

Adobe Photoshop Elements 12:

Installed on all media lab computers. This program can be used to edit and enhance digital photos.

PowerDirector Ultimate 12:

This is video editing software. Can be used to create and edit movies.

JFJ Easy Pro Disc Buffer:

Use to clean and repair DVDs, CDs and some game discs. Can also clean Blu-ray and PS2 discs.

Laminator:

Items up to 11.5" wide and any length can be laminated. There is a cost of 75¢ per foot.

Epson Perfection V600 scanner:

Can scan photos, slides and negatives and turn them into digital images. You can also scan a typed document and convert it into an editable document file.

2 VHS/DVD Recorders:

Can convert VHS and VHS-C tapes to DVD. You can also connect a camcorder and record straight to DVD.

Diamond VC500 Video Capture Device:

This device is connected to a media lab computer. You can connect video cameras to this device and it will upload the file so you can burn it to a DVD.

TEAC CD Recorder:

TEAC's is a full audio and dubbing system with turntable, CD recorder, cassette player, and computer interface. Drop your record on the three-speed turntable, place a blank audio CD-R or CD-RW in the CD drive and hit record. Transferring your music collection into a digital, portable format couldn't be simpler.

Cricut Explore Air:

Cricut is an electronic die cutter used by paper crafters, cardmakers and scrapbookers. To use this machine you will create a free account on Cricut.com to design your item. Then use the machine to cut your paper.

2 Webcams:

Connected to the media lab computers. Webcams can be used to Skype, create podcasts or videos.

Yeti USB Microphone:

Connected to a media lab computer. It can be used for voiceovers when editing movies or for better sound with the webcam.

Wacom Intuos Pen and Touch Graphic Tablet:

Replaces your mouse and turns your computer into a digital drawing canvas. Use the pen or your fingers to navigate, scroll, and zoom your artwork.
